

Jude Victor A.

Electrical & Electronics Engineering Student

judeportfolio-sigma.vercel.app | github.com/Jude1609 | ajudevictor2005@gmail.com | +91 97159 40712 | linkedin.com/in/jude-victor1609

EDUCATION

SRM TRP ENGINEERING COLLEGE

B.E. IN ELECTRICAL AND ELECTRONICS
ENGINEERING

Aug 2023 – Present

Tiruchirappalli, Tamil Nadu

Expected Graduation: 2027

IIT BHUBANESWAR

PG / PROFESSIONAL DIPLOMA IN STCD

Starting July 2025 | Provisional Admission

SKILLS

EMBEDDED SYSTEMS

Arduino • ESP32 • Raspberry Pi • ARM Cortex-M3

• Motor Control • Sensor Interfacing

PROGRAMMING

Python • Embedded C • C++ (Basic) •

MicroPython • ROS • ROS2

TOOLS & SOFTWARE

MATLAB • Fusion 360 • LTSpice • SolidWorks • Git

• VS Code

TESTING & VALIDATION

Functional Testing • Hardware Debugging •

Sensor Calibration • Oscilloscope

CONCEPTS

Embedded Systems • IoT • Control Systems •

Robotics • Basic Electronics

CERTIFICATIONS

Embedded for Beginners

NIELIT Calicut — April 2025

Diploma in Electronics Mastery

Chitti & LMES — Feb 2026

IoT & Robotics Training

Corizo — Oct–Nov 2024

Learn Python

CodeChef — July 2023

Learn C Pro

CodeChef — Sept 2023

ACHIEVEMENTS

SJC National Level Innovation

2nd Place — St. Joseph's College National Level
Innovation Contest

Hacknovus-2K25

Participant — K. Ramakrishnan College of
Engineering (April 2025)

IDEATION SERIES

Participant — SRM TRP Engineering College
(August 2025)

Freelance & Client Projects

Delivered 10+ embedded/hardware projects for
clients and peers — full product builds, PCB
design, firmware, and repairs

EXPERIENCE

ACMEGRADE | Intern, Embedded Systems

May 2024 – July 2024 | Remote

- Contributed to embedded system development; gained hands-on experience in hardware-software integration and firmware workflows.
- Supported testing and debugging of microcontroller-based modules in a professional engineering environment.

COGTIS TECHNOLOGIES PVT LTD | Intern, Basic Electronics

Sept 2023 | Tamil Nadu

- Applied fundamental electronics concepts in real-world product development; supported circuit assembly, component testing, and project execution.

KARTHIKESH ROBOTICS | ROS2 Workshop Participant

Jan 2025 | Virtual

- Completed hands-on ROS2 workshop covering node architecture, robot communication, and control pipelines.

TRANSISTA | Hardware & Software Engineer | Startup

Jan 2023 – Present | Tamil Nadu

- Contribute end-to-end across hardware and software — embedded firmware, PCB-level circuit work, 3D modelling/printing, and full product builds.
- Deliver complete project ownership on client builds — from requirement analysis and development through testing, deployment, and repair.

PROJECTS

PROSTHETIC HAND WITH CUSTOM LOGIC CONTROL

Academic Project | March 2024

Engineered a functional 5-DOF prosthetic hand prototype with custom servo motor control and multi-finger actuation. Reduced BOM cost by ~40% via strategic component selection. Validated endurance across 200+ actuation cycles.

AUTONOMOUS MOBILE ROBOT (AMR) — DOCKING & TROLLEY MOVEMENT

Academic Project | Nov 2024

Developed an AMR with autonomous navigation, precise docking, and trolley manipulation using ROS and Gazebo. Implemented localization and path-planning algorithms validated in simulated industrial environments.

IMU-CONTROLLED GESTURE VEHICLE

Academic Project | June 2023

Built gesture-controlled vehicles using IMU sensors; achieved sub-100ms input-to-actuation latency. Improved accuracy by ~30% through sensor calibration and digital filtering.

INDUSTRIAL EXPOSURE

TÜV SÜD, BANGALORE | Industrial Visit

17 April 2026 | Bangalore

- Observed real-time electronic product testing using oscilloscopes, multimeters, and professional validation setups aligned with IEC/ISO standards.
- Gained direct understanding of international safety standards, certification processes, and compliance testing workflows.
